Cloud Computing Basics - MCQ Practice Sheet

Part A: Questions 1 to 8 (answers are printed below each question).

Q1. Which cloud service model lets developers deploy applications without managing servers or operating systems?

(a) IaaS (b) PaaS (c) SaaS (d) DaaS

Answer: (b) PaaS

Q2. What does elasticity mean in cloud computing?

(a) Storing data in several countries (b) Encrypting data automatically (c) Automatically adding or removing resources as demand changes (d) Moving data between two clouds

Answer: (c) Automatically adding or removing resources as demand changes

Q3. Which storage type is best suited for unstructured data such as images and videos?

(a) Block storage (b) Object storage (c) Tape storage (d) Cache storage

Answer: (b) Object storage

Q4. What does a Content Delivery Network (CDN) mainly reduce?

(a) Electricity cost (b) Licence cost (c) Latency for users (d) Number of databases

Answer: (c) Latency for users

Q5. In the shared responsibility model, who is responsible for securing the customer's own data?

(a) The cloud provider (b) The customer (c) The internet provider (d) The hardware vendor

Answer: (b) The customer

Q6. Which deployment model combines on-premises infrastructure with a public cloud?

(a) Private cloud (b) Community cloud (c) Hybrid cloud (d) Edge cloud

Answer: (c) Hybrid cloud

Q7. What is the main purpose of a load balancer?

(a) Compressing files (b) Distributing incoming traffic across several servers (c) Backing up databases (d) Monitoring billing

Answer: (b) Distributing incoming traffic across several servers

Q8. Which technology packages an application with its dependencies into a portable unit?

(a) Containers (b) Firewalls (c) Routers (d) Snapshots

Answer: (a) Containers

Part B: Questions 9 to 12 (answers are in the Answer Key on the last page).

Q9. What does SLA stand for in cloud contracts?

(a) Service Level Agreement (b) Secure Login Access (c) System Load Analysis (d) Storage Layer Architecture

Q10. Which protocol is used to secure web traffic with encryption?

(a) FTP (b) HTTP (c) HTTPS (d) SMTP

Q11. Which of the following is a NoSQL database?

(a) PostgreSQL (b) MongoDB (c) MySQL (d) Oracle

Q12. What does the term serverless mean?

(a) There are no physical servers at all (b) Servers are only used for backups (c) Only mainframes are used (d) The provider manages servers and you only deploy code

Answer Key (Part B)

Question	Correct option
Q9	(a)
Q10	(c)
Q11	(b)
Q12	(d)
